

Size Guide

Choose the size offered for the exact product. Clothing labels, age bands and footwear numbers are not interchangeable.

Men's shirt reference

The existing store reference below uses inches. It is a general reference, not a guarantee that every shirt has the same garment measurements.

Size	Chest (in)	Shoulder (in)
S	38	17
M	40	18
L	42	19

Measure before choosing

Measure your chest around its fullest part without pulling the tape tight. For shoulders, compare the shoulder seam distance of a similar well-fitting shirt. Compare the style and fit as well as the size label.

Women, kids and footwear

Women's styles commonly offer XS, S, M, L and XL. Check product-specific measurements when available.

Kids products use age-band labels such as 2-3Y, 4-5Y, 6-7Y, 8-9Y and 10-11Y. Age alone does not guarantee fit.

Footwear currently uses numeric labels 6 to 10. Confirm the sizing system and foot-length measurement for the selected style before choosing.

One Size and available stock

One Size is used for selected accessories. Check dimensions and any adjustable fit information. Only sizes with available stock can be ordered.
